

Is It Time for Your Control System – Health Check™? Reduce Downtime & Extend the Life of Your System

Applies to Following Control Systems:

Mark IV / Mark V / Mark VI / Mark VIe

To Improve Your Software & Screens

- Avoid Nuisance Alarms
- Sequence/Screen Modifications
- Control Constants Review vs. Control Specification (MLI A010)
- Increase User Friendliness

Resolve Long-Standing Issues

- Check Your DC Voltage/Battery
- File System Clean-Up
- Check Health of Spares
- Cleanliness Assessment
- Junction Box & Tightness Check
- Identify Any Outstanding Issues

Extend Life of Your System

- Work with Trained Expert GTC Engineer
- Rectify All Minor Issues
- Discuss Any Major Faults or Concerns
- Get Recommendations for Improvement

**GTC's Health Check is also available for
excitation systems and LCI upon request!**

Our Health Check Process is Simple:

ASK GTC TO PERFORM A SYSTEM HEALTH CHECK:

Our trained GTC Speedtronic™ engineer visits your site to perform a series of tests to examine your control system.

AT THE END OF THE CHECK, YOU RECEIVE A FULL STATUS REPORT:

This will advise you on the state of the panel and give any recommendations for restoring the control system to operate efficiently without errors.

THE TEST TAKES TWO DAYS ONSITE:

All minor errors found will be corrected onsite to prolong the life of your control system. Any major faults found will be detailed in the report and discussed with you at site before rectifying.

Interested in a Control System Health Check? Contact your GTC regional representative!
